

Who we are – Challenge Dairy is a Bay-area food service company that has specialized in delivering fresh, quality, dairy products for over 100 years. Make no mistake: dairy is our “game!” We receive and deliver milk fresh every working day and turn our butter stock every week.

What we do – We manufacture our own butter and cream cheese in California. Our milk is used to produce our domestic cheeses that have the Challenge Dairy label. We carry specialty California cheeses as well as a full line of imported cheeses.

California Here We Come! – Challenge Dairy represents dairy farmers and their families that call California “home.” We are firm believers in connecting California’s farmers to the local food industry to promote farm-to-table principles and ensure the freshest products possible.

We are the last of the “Milk Men!” – We offer different service levels that other companies don’t provide such as build-up services and stock-and-rotate programs.

Keep on trucking – You can expect on-time delivery service from us. Our temperature-controlled delivery trucks are in San Francisco five days a week. That means flexible delivery options for **YOU**.

Want a program? – We will create a dairy products program that fits your needs. Ordering is easy, whether you call us yourself, have our order desk call you, or you use our online order system.
